DIVE! Open Water Diver Course

\$595 NO HIDDEN COSTS

If you purchase Mask, Snorkel, fins and boots from Dive Picton during your course you will receive a rebate of \$100.00 towards that purchase!

For something a little different...

DIVE! GOLDEN SANDS Open Water Programme

This is the crème de la crème of Open Water dive courses. The open water training is undertaken in the tropical South Pacific, with options on Fiji, Samoa, Tonga, Vanuatu and Tahiti. Full accommodation and all costs (except alcohol) are covered inclusive of air travel.

New complete Scuba Dive equipment is supplied (and yours to keep) with the training being 1 on 1. This is ideal for the individual or couples that wish not only for adventures and international open water dive training, but also a forever remembered vacation.

\$10,195

With all courses you need to supply a dive medical from a doctor. We can arrange this locally or send you the form.

Also bring a friend and save \$25 each!

If you have already completed an entry level scuba experience or have a referral (and have the paperwork) this can be credited towards your course at the instructor's discretion. Discounts are also available for bookings of 2 or more students.

Nervous, Excited? Scared?

We understand those emotions at Dive! Picton—we were there once!

We put your safety and comfort FIRST! During the course you will learn dive theory through self-study, video, and instructor guidance, and completing Pool and Ocean dives. We restrict our course numbers to 4 per instructor, unless otherwise requested, to ensure your safety and comfort in the water. You learn to dive, by diving! No pressures, extra pool sessions and an extra open water dive ensures you are confident when you get certified!

Knowledge Development

You can take your Open Water Manual away with you today or have it sent to you, and start learning about the fundamentals of scuba diving. There are 6 Theory Modules, where you learn about the underwater world, dive equipment, communication underwater, the diving environment, the effects of breathing air at depth, navigating underwater, and how to dive safely. After each module there are Study Guide questions to review the information, and a final exam at the end of your course to ensure retention of information (multiple choice!). We would like you to have read and filled out the reviews for modules 1, 2 & 3 before the first day of your course, so we can get you diving as soon as possible.

Pool Dives

The pool dives are where the fun really begins. We will show you how to set up and use your scuba equipment, and then you can discover the feeling of breathing underwater, and weightlessness. There are several Pool Dives; all conducted in our private, on-site, indoor, heated pool. You will practice skills & techniques in this low stress environment that you'll use on your dives in the ocean. You

will be provided with a set of **top quality** dive equipment including weight integrated BCDs, Aqualung Legend Regulators and Dive Computer. However it is advisable that you think about purchasing your own Mask, Snorkel, Boots, and Fins, as these are personal items. Also, talk to us about the benefits of owning your own equipment as hire gear outside of Dive! Picton is generally not as comfortable!

Ocean Dives

You complete 4 dives in the ocean to be certified as an Open Water Diver. You will learn how to dive from the shore and from our 6.7m Naiad dive boat. During the ocean dives, you will apply the skills & knowledge learnt in the pool and through your knowledge development. You will also have time to explore this underwater world with your instructor guiding you, and showing the best of what the

Marlborough Sounds have to offer. Included in your Open Water Course is a fifth dive so you can start to feel like a real Scuba Diver!

SERIOUS fun

What it includes!
